This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional):

Botium Toys should increase security by utilizing stronger passwords, a password manager, and multi-factor authentication. They should have a backup plan in place in case of system failure and employ encryption to secure client and payment information. They should restrict access so that only authorized personnel may view sensitive information and implement techniques such as IDS to identify attacks early. Botium Toys should also adhere to compliance standards such as PCI DSS and GDPR to preserve consumer privacy and data security.
